We are happy to announce a new **Litigation Technology & Support Division** in Bizibody.

Headed by Serena Lim, this new division aims to help litigation lawyers harness technology in case management and litigation strategy.

*"Our first priority is education and training, as even the most seasoned litigators do not know how technology tools today can help them litigate better or reduce time and cost. Once you gain an insight into what litigation software can do, you will recognise that its a much better way of preparing your cases.*

*We believe that litigation software will raise the bar in case preparation, reduce burn-out in younger litigators and the over-reliance on litigation support staff; ultimately leading to a less stressful and more enjoyable litigation practice" - Serena Lim, CEO*

Our **Education Program for Litigators** began with the 15-hour Essential E-Discovery Workshop for the Singapore Academy of Law in Feb-March this year.
