SECURITY

Stringent security measures in place to protect clients

- SSL encryptions
- Malware testing and identity verification
- Data confidentiality

FUNDING ASSISTANCE

70% subsidy for implementation cost for the first year, under the SPRING Singapore Tech Start for Law Scheme

What clients say:

"Clio has become an indispensable practice management tool for my solo practice. It's intuitive, well thought out and well designed, with just the right number of features. No unnecessary bells and whistles. It allows me to keep close track of my time, expenses; to track my billings, to manage my client database. I especially like the billing features; you can generate a pretty detailed bill quite easily. It also frees you from your desk or even your laptop – the phone app has most of the features that you would need on a daily basis. I highly recommend it."

- Chua Sui Tong, Rev Law LLC

"One of the banes of legal practice is the handling and processing of paperwork. This is reduced to a large extent by Clio as the software enables my law firm to track petty cash claims and payments, generate bills and receipts, monitor the state of finances and manage files from a convenient web-based platform (without using any paper). Clio is also easy to set-up and use. All it took was a few minutes of demonstration by my book-keeper and some experimental clicking around on my own before I became proficient enough to use the software. I am grateful to Clio for bringing order and peace to an otherwise chaotic practice!"

- Kelvin Chia, Lumen Law Corporation

"The lawyers in the firm cannot imagine how we could have practiced so many years without...Clio. We love how these cloud-based programs bring us through the life span of our files - from file opening to...invoicing - in such a seamless manner."

- June Lim, Eden Law Corporation
